

Any style or size home can meet New Jersey ENERGY STAR Homes Program's standards for superior energy performance, using 15%–50% less energy.

BENEFITS OF THE NEW JERSEY ENERGY STAR HOMES PROGRAM ARE:

- Lower energy bills
- Less energy use
- Improved indoor air quality
- Third-party testing and verification
- A quieter home
- Improved year-round comfort
- Better for the environment

NEW JERSEY ENERGY STAR HOMES PROGRAM

This program is offered through *New Jersey's Clean Energy Program* and provides ways for you to save energy, money and the environment. Ask a builder for more information about these homes.

NEW JERSEY ENERGY STAR® HOMES PROGRAM

Quality you can count on. Performance tested to prove it.

Before you break ground, ask your builder about the New Jersey ENERGY STAR Homes Program for a lifetime of savings.

THINK HOW MUCH YOU'LL SAVE BY BUILDING AN ENERGY EFFICIENT HOME.

When you build a home within the New Jersey ENERGY STAR Homes Program, you'll use 15%–50% less energy, making your home more affordable to buy, operate and maintain. It doesn't have to cost any more to build this way and you'll be helping the environment, too.

New Jersey's Clean Energy Program™ and builders throughout the state are working together to make these highly energy efficient homes available to you. If you're purchasing or building a new home, you'll want to know about this program. These homes are well constructed, energy efficient, less expensive to operate, and offer improved year-round comfort and indoor air quality.

BENEFITS ARE BUILT RIGHT IN – AND BUILT IN RIGHT.

When it comes to energy, homes built as part of the New Jersey ENERGY STAR Homes Program outperform traditionally built homes. They are better designed and constructed for maximum energy efficiency. They use 15%–50% less energy than the average new home. And using less energy means lower energy bills and a reduced environmental impact.

"We've found our home very comfortable. The temperature is the same room to room and there are no drafts. There is no need to adjust the thermostat."

— Jill and Ray Acampora

BUILT TO BE BETTER WITH:

- High-efficiency heating, cooling and water heating systems
- Added levels of insulation in walls, foundation and attic
- Sealed and insulated duct systems
- ENERGY STAR qualified windows
- ENERGY STAR qualified appliances and lighting

THIRD-PARTY TESTING

Benefits of this program are assured through an energy analysis based on home design, inspection at key construction stages, and performance testing upon completion to certify that your new home meets New Jersey ENERGY STAR Homes Program standards.

BE SURE YOUR NEW HOME IS PART OF THE NEW JERSEY ENERGY STAR HOMES PROGRAM.

Any builder of residential new construction in New Jersey is eligible to participate in New Jersey ENERGY STAR Homes. For more information for you and your builder, call 866-NJSMART or check our website at NJCleanEnergy.com/NJESH.
